Kojamo's portfolio as at 30 Sep 2020

- Kojamo focuses on the seven Finnish growth centres and high-quality rental apartments, marketed under the Lumo brand
- Target to create profitable growth – over 4,500 apartments in pipeline for the next years
- Strong role in digital transformation of the housing industry

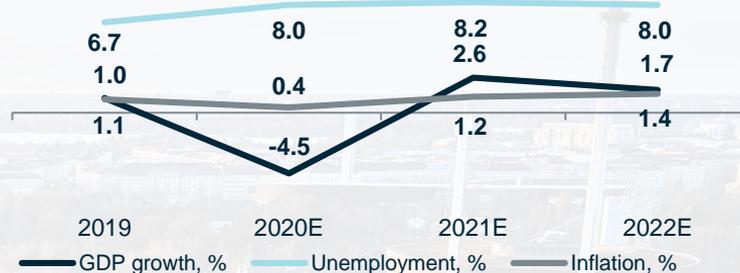

Operating environment

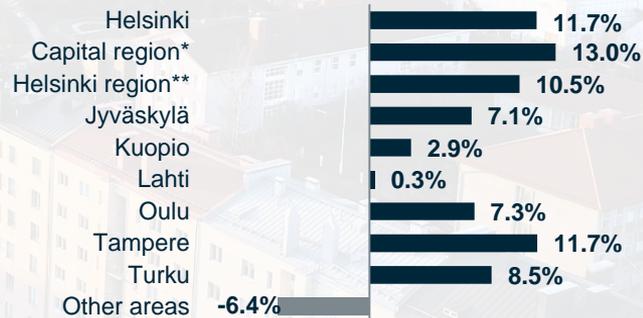

General operating environment

- The COVID-19 pandemic has contracted the Finnish economy less than most European economies and the economy has started gradually recover during the summer
- The Finnish GDP is predicted to contract by 4.5 per cent in 2020. In addition to a decrease in exports, there will be a contraction of private consumption and private investment
- The impacts of the pandemic on the housing market are expected to be short-lived and urbanisation is expected to continue

Business environment key figures

Population growth forecast 2019–2030

Operating environment

Industry operating environment

- Urbanisation and decreasing average size of households increase the need for new apartments
- The pandemic has increased the slowing down of housing start-ups and the housing production is expected to be below the annual demand for housing in 2020 and 2021
- The supply in the long-term leasing market increased in the first part of the year, when new completed production entered the market and apartments intended for short-term rental were switched to long-term rental. These impacts are expected to be already fully in the market

Operating environment

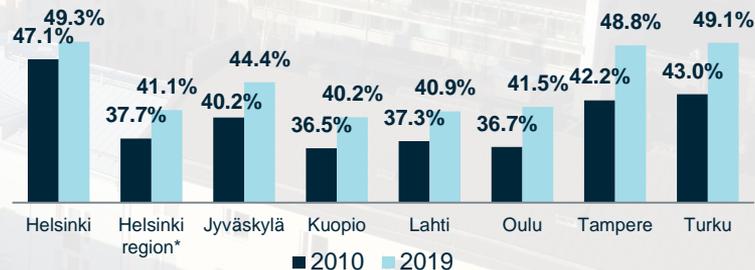

Pandemic does not have a long-term impact on the rental market

- In a longer term, migration keeps the demand for rental apartments especially close to good connections high. The significance of location and services is highlighted in housing needs
- People are increasingly attracted by the freedom provided by rental housing, which supports the development of the market for a long time
- In Helsinki, Tampere and Turku there are already more rental households than owner-occupied and the amount has increased in all of the largest city areas. This is a strong sign of acceleration of urbanisation and changes in living preferences as well
- Corona virus pandemic slowed down housing trade and uncertainty increases the popularity for rental apartments

Outlook for Kojamo in 2020

Kojamo estimates that in 2020, the Group's total revenue will increase by 2–5 per cent year-on-year. In addition, the company estimates that the Group's FFO for 2020 will amount to between EUR 146–158 million, excluding non-recurring costs.

The outlook takes into account the effects of the completed housing divestments and acquisitions, the estimated occupancy rate and rises in rents, as well as the number of apartments to be completed. The outlook is based on the management's assessment of total revenue, net rental income, administrative expenses, financial expenses, taxes to be paid and new development to be completed, as well as the management's view on future developments in the operating environment.

Additionally, the outlook is based on strong demand sustained by migration, which will increase Like-for-Like rental income. The management can influence total revenue and FFO through the company's business operations. In contrast, the management has no influence over market trends, the regulatory environment or the competitive landscape.

Kojamo's management estimates that the COVID-19 pandemic does not have a significant impact on the company's outlook for the rest of the year.

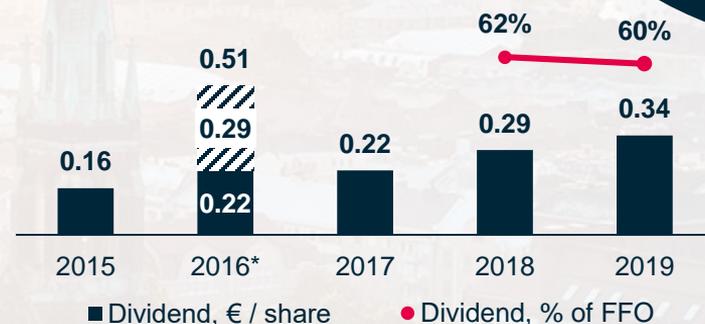

Dividend policy

Kojamo's objective is to be a stable dividend payer whose annual dividend payment will be at least 60 per cent of FFO, provided that the Group's equity ratio is 40 per cent or more and taking account of the company's financial position

Dividend history

* Including extra dividend EUR 0.29 per share
Per share key figures have been adjusted to reflect the impact of the decision by the Extraordinary General Meeting of Shareholders on 25 May, 2018 regarding the share split. In the share split the shareholders received 30 new shares per each existing share

Change in the valuation technique of investment properties as at 31 December 2019

Change	Kojamo shifted from a transaction-based valuation technique to a yield-based valuation technique in the valuation of its investment properties
Rationale	The change in the valuation technique will make the company more comparable with its relevant international peer group
External valuation partner	Jones Lang LaSalle Finland Oy (JLL)
Entry into force	The new valuation technique was implemented on 31 December 2019. The change is a change in accounting estimates by nature, and it will not be applied retrospectively
Description of the technique	<p>The new valuation technique is based on 10-year discounted cash flow (DCF) calculations. The discount rate is the 10-year cash flow yield requirement plus inflation. The weighted yield requirements used are the following:</p> <ul style="list-style-type: none">• Capital region 3.83%• Other regions of Finland 5.05%• Group total 4.23% <p>JLL has given a statement about Kojamo's valuation, and the fair value of the investment properties under the assessment corresponds this statements</p>
